

Challenges and Change

The National Center for Ethics of the Veterans Health Administration (VHA) announces publication of a book entitled Challenges and Change. This compendium contains fourteen reports produced by VHA's National Ethics Committee during the last 6 years, making them collectively available to the public for the first time.

Reports by the VHA National Ethics Committee provide a first-hand glimpse into the history and development of ethics standards within the largest health care system in the country. Founded in 1986, the Committee is an interdisciplinary group charged by the Under Secretary for Health to issue reports on ethics-related topics. Each report describes an ethical issue, summarizes its historical context, discusses its relevance to VHA, reviews current controversies, and outlines practical recommendations. Scholarly yet practical, these reports are intended to heighten awareness of ethical issues and to improve the quality of health care, both within and beyond VHA. Over the years reports have served as resources for educational programs, guides for patient care practices, and catalysts for health policy reform. Topics range from futility to resource allocation to research on subjects with impaired consent capacity.

The book is in its first printing, and there is no charge to acquire copies while supplies last. To request a book, please fill out the order form below and mail or fax to:
